

THE SNOWY DAY

by Ezra Jack Keats

2. Use the index of the newspaper to find your local weather information. Locate the page. Point out the predicted high temperature for each day of the week. What day will be the warmest? What is the temperature difference between the predicted warmest and coldest day? Predict what day would be the best for making tracks in the snow?

Make your own weekly weather chart in the space below. Number each box with the correct date. Use the calendar and draw weather pictures for each day.

How many different types of weather will we have this month?
sunny _____ snowy _____ cloudy _____ rainy _____

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday

Subject: Reading

Grade 1st, 2nd, 3rd

Skill: Use scientific process skills: observing, collecting data recording, measuring and predicting.
