Vocabulary Instruction that Works: It's More than Word Lists

It's not enough for readers to be able to decode words accurately (phonics), they also need to know what those words mean (vocabulary). Too often, though, vocabulary instruction is relegated to word lists and work sheets. In his presentation, Tim Rasinski will present actionable, artful, and engaging approaches to develop students' vocabularies and also their love of words and word study.

Honoring our Learners: Formal and Informal Classroom Assessments

Teachers use formal assessments to gather screening, progress, diagnostic, and summative data about their learners to inform their instruction. However, these assessments cannot capture all the ways in which the learners make sense of written text. In this session we will discuss multiple ways to collect formal and informal data on students' literacy progress and how these strategies can add nuance to the numbers provided by standardized assessments, honoring the funds of knowledge that our learners bring to classrooms every day.

Real Life Revision Strategies

You and your students have sorted through ideas and produced rough drafts. What comes next? Revision! The 'messy middle' during revision is the point at which many student (and adult) writers throw in the towel. But revision isn't just changing a few words or "writing it again." Join children's author Barb Rosenstock as she presents practical techniques for turning drafts of any length into great writing. Learn how to write like a reader, use word counts and word banks in new ways, and consider the visual shape of a draft.

Wait, Don't Just Translate: Multidimensional Strategies for Multilingual Learners

To translate or not to translate, is that the question? Or is it more important to explore ways to use translation intentionally while implementing carefully designed, scaffolded lessons? This session is designed to explore how does translation help throughout the school day, especially in the earliest stages of language development and what strategies other than translation can be used to support newcomers' academic, language, literacy, and social-emotional growth.

Enhancing Visual Literacy Through Picture Books

Applying the method of shared inquiry when reading picture books can help children with decoding and developing their ability to critically read the visual world. Humans tend to trust their eyes: "I saw it with my own eyes," "Seeing is believing." However, we know witnesses can be wrong, special effects are convincing, and biases can go unchecked. When one considers the curated and constructed nature of so much of our visually saturated world (adverting, TikTok, Instagram etc.), it's more important than ever that we look closely and question what we see. Story time is a great place to start that conversation with young children.
